The IMAGERY ANALYSIS SERVICE NOTES is a periodic publication of the DDI Imagery Analysis Service, the departmental PI organization of CIA.

This publication highlights significant or timely intelligence items derived from photography.

The interpretations in this publication represent preliminary views which are subject to modification in the light of further information and more complete analysis.

WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793, 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

CHINA

Status of the Cement Industry

A study of available photography indicates that the Chinese capacity to produce cement remained relatively stable during [] Of the 40 major cement plants identified in China, 37 are complete and operational. The only expansion noted during the year was the addition of one kiln to the Kuo-kuo Plant. The operational plants contain at least 86 and probably 92 rotary kilns. During [] 63 rotary kilns were observed in operation at 32 of the plants. No kilns were seen in operation at three of the other completed plants, and the remaining two were not seen on photography during the year.

For detailed descriptions of these plants, see the recent IAS report Selected Cement Plants, China, FCS 13/0145/69, June 1969.
